Experience

Research Assistant | Data Analytics | Binghamton University Sep 2025 – Jan 2026

- Built Python ETL workflows to clean, transform, and validate research datasets, reducing manual analysis time by **30%** and supporting repeatable analytical reporting.
- Developed visual reporting to communicate experimental trends, comparisons, and data-quality findings for research review and decision-making.
- Standardized dataset transformations and validation steps to improve consistency of recurring analysis and downstream reporting outputs.

Software Engineering and Data Intern | Global Health Impact May 2025 – Sep 2025

- Automated ingestion, transformation, reconciliation, and validation of multi-sheet WHO datasets using Python, reducing manual data preparation by **30%**.
- Converted DALYs, treatment coverage, drug efficacy, and country-level indicators into quantitative comparisons and stakeholder-facing analytical reports.
- Standardized reporting inputs and data-quality checks across source sheets, improving consistency of recurring analysis and stakeholder-ready outputs.

Data Analyst | R&P Consultants Apr 2023 – Apr 2024

Promoted from Data Analyst Intern, Apr 2022 – Apr 2023

- Automated recurring production and inventory reporting using **MySQL, Python, and Excel**, improving consistency and efficiency of weekly management reporting.
- Integrated and reconciled production, inventory, procurement, and machine-utilization data from multiple operational sources to support reliable KPI reporting.
- Built Excel KPI dashboards for production output, inventory levels, and machine utilization, enabling management reviews, operational planning, and performance monitoring.
- Refined recurring report structures and KPI outputs to make operational performance easier to monitor, compare, and communicate during management reviews.

Projects

CRM/ERP Business Intelligence | PostgreSQL, SQL, Python, Power BI [\[GitHub\]](#)

- Built a dimensional analytics warehouse from **1.56M+ records across 11 source tables**, implementing PostgreSQL raw, staging, dimension, and fact layers for CRM and marketplace reporting.
- Defined KPI logic, metric definitions, source-to-target mappings, and BI views for **99K+ orders**, seller acquisition, customer behavior, delivery performance, and marketplace operations.

Healthcare BI & Readmissions Analysis | SQL, Python, Excel, Power BI [\[GitHub\]](#)

- Built reporting views across **11,720 hospital-condition records** to benchmark readmission performance by condition, geography, ownership, hospital rating, and patient volume.
- Developed KPI reporting, reusable SQL views, metric definitions, an executive Excel workbook, and interactive dashboards for hospital benchmarking and opportunity prioritization.

Banking Risk BI & Executive Reporting | SQL, Python, Excel, Power BI [\[GitHub\]](#)

- Modeled FDIC and FRED data into decision-ready reporting for profitability, credit risk, funding pressure, deposits, capital strength, and interest-rate sensitivity.
- Built peer benchmarking, risk-tier KPIs, watchlists, macro trend reporting, and an executive Excel workbook using SQL analyses with **CTEs and window functions**.

Technical Skills

Business Intelligence & Reporting: Power BI, Tableau, DAX, Power Query, Excel (Pivot Tables, XLOOKUP), KPI Development, Dashboard Development, Executive Reporting, Data Visualization

Data Modeling & Analytics: SQL (Joins, CTEs, Window Functions), Python, Pandas, ETL, Dimensional Modeling, Data Warehousing, Data Validation, Data Reconciliation, Trend Analysis

Platforms & Databases: PostgreSQL, MySQL, SQLite, DuckDB, Microsoft Fabric, Supabase, Streamlit, Plotly, Git, GitHub

Education & Certifications

Binghamton University, SUNY Binghamton, NY | *M.S. Computer Science, Expected Dec 2026*

Dr. D. Y. Patil International University Pune, India | *B.S. Computer Science (AI/ML), May 2023*

Microsoft Certified: Fabric Analytics Engineer Associate [\[Verify\]](#) *Aug 2026*

Microsoft Certified: SQL AI Developer Associate [\[Verify\]](#) *Aug 2026*
