Experience

Research Assistant | Data Analytics | Binghamton University

Sep 2025 – Jan 2026

- Built Python ETL workflows to collect, clean, transform, and validate research datasets, reducing manual analysis time by **30%** and enabling repeatable analytical reporting.
- Analyzed experimental results, investigated data inconsistencies and outliers, and developed visualizations to communicate trends and comparisons for research review.
- Documented analytical workflows, validation logic, and dataset transformations to improve reproducibility, consistency, and interpretation of research outputs.

Software Engineering and Data Intern | Global Health Impact

May 2025 – Sep 2025

- Automated ingestion, cleaning, transformation, reconciliation, and validation of multi-sheet WHO datasets using Python, reducing manual data preparation by **30%**.
- Analyzed DALYs, treatment coverage, drug efficacy, and country-level indicators and translated findings into quantitative comparisons and stakeholder-facing reports.
- Investigated cross-source inconsistencies and missing values, applying validation checks and standardized transformations to improve reliability of downstream analysis.

Data Analyst | R&P Consultants

Apr 2023 – Apr 2024

Promoted from Data Analyst Intern, Apr 2022 – Apr 2023

- Automated recurring production and inventory reporting using **MySQL, Python, and Excel**, improving the consistency and efficiency of weekly operational analysis.
- Cleaned, validated, reconciled, and analyzed production, inventory, procurement, and machine-utilization data from multiple operational sources to identify trends, discrepancies, and performance drivers.
- Built Excel KPI reports and dashboards for production output, inventory levels, and machine utilization, supporting management reviews, operational planning, and data-driven decision-making.
- Performed ad hoc analysis on operational performance and reporting discrepancies, translating findings into actionable recommendations for management review.

Projects

CRM/ERP E-Commerce Analytics | PostgreSQL, SQL, Python, Power BI

[\[GitHub\]](#)

- Analyzed **1.56M+ CRM and transactional records** across **11 source tables**, building PostgreSQL raw, staging, and analytical datasets for customer, seller, order, delivery, and marketplace analysis.
- Implemented data-quality checks, reconciliation controls, analytical SQL, and metric definitions to evaluate **99K+ orders**, seller acquisition, customer behavior, delivery performance, and operational trends.

CMS Hospital Readmissions Analysis | SQL, Python, Excel, Power BI

[\[GitHub\]](#)

- Analyzed **11,720 hospital-condition records** using SQL, Python, and statistical testing to evaluate readmission performance across conditions, states, ownership types, ratings, and patient volume.
- Developed an opportunity-scoring framework, reusable SQL views, data-quality documentation, and executive analysis to prioritize hospitals with elevated readmission-reduction potential.

U.S. Banking Risk Analysis | SQL, Python, Excel, Power BI

[\[GitHub\]](#)

- Built a reproducible FDIC and FRED analytics pipeline to evaluate profitability, credit risk, funding pressure, deposit trends, capital strength, and interest-rate sensitivity.
- Developed peer-relative risk scoring and SQL analyses using **joins, aggregations, CTEs, and window functions** to support benchmarking, watchlists, trend analysis, and business questions.

Technical Skills

Data Analysis: SQL (Joins, Aggregations, CTEs, Window Functions), Python, Pandas, SciPy, Statistical Analysis, Trend Analysis, Ad Hoc Analysis, Root-Cause Analysis

Data Preparation & Modeling: ETL, Data Cleaning, Data Validation, Data Reconciliation, Data Quality Checks, Dimensional Modeling, Data Warehousing

BI, Databases & Tools: Excel, Power BI, Tableau, DAX, Power Query, PostgreSQL, MySQL, SQLite, DuckDB, Microsoft Fabric, Streamlit, Plotly, Git, GitHub

Education & Certifications

Binghamton University, SUNY

Binghamton, NY | *M.S. Computer Science, Expected Dec 2026*

Dr. D. Y. Patil International University

Pune, India | *B.S. Computer Science (AI/ML), May 2023*

Microsoft Certified: Fabric Analytics Engineer Associate [\[Verify\]](#)

Aug 2026

Microsoft Certified: SQL AI Developer Associate [\[Verify\]](#)

Aug 2026
